

Members to "Discover" Tampa in 1992

Five-hundred years after Columbus discovered the New World, College members will discover a new world of prosthodontics in Tampa at this year's annual session.

More accomplished as a sailor than as a navigator, Columbus actually is thought to have landed in the Bahamas while searching for Japan. History does not record whether Columbus made a detour to Tampa and stayed at the Hyatt Regency hotel, but members who make this journey will discover an inviting city and a first-rate scientific program.

THE ANNUAL SESSION WILL TAKE PLACE NOVEMBER 5-8.

"This year's meeting promises to provide education on new clinical techniques and management practices designed to help prosthodontists provide better care for patients as well as operate a more efficient practice," said ACP President Dr. David W. Eggleston.

Participants can choose to attend either private practice or scientific sessions during the first day of the meeting. Highlighting the private practice session is an all-day seminar by internationally renowned dental practice

management consultant Jennifer de St. Georges, who will address the issue of educating the referring dental and medical practitioner in order to develop positive and productive relationships.

Individuals attending the meeting will have the opportunity to hear investment expert James B. Jackson, DDS, who will present "Winning Financial Strategies for Prosthodontists." Charles Greene, DDS, and Harold T. Perry, DDS will present the latest information on TMD and new concepts and diagnosis in the treatment of craniomandibular dysfunction patients. Presentations on implant dentistry, oral cancer management and advances in prosthodontics will also be part of the scientific session.

Dr. Gordon Christensen will share his expertise regarding the latest materials and techniques for fixed, removable, and implant prosthodontics.

Attendees can also take advantage of sessions on ceramics, informed consent and communicating the value of service to prosthodontic patients.

Complete details regarding this year's meeting can be found beginning on page 3. ♦

Taste of Tampa

SOCIAL EVENTS FEATURE FOOD AND FUN

Starting with the Arrivals Dinner on Wednesday and ending with the President's Dinner Dance on Saturday, members and guests will have the opportunity to attend a variety of social events to sample the great food and pleasant ambiance of Tampa, one of America's most attractive destinations.

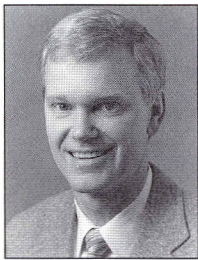

The Arrivals Dinner will be held at the University Club, Tampa's oldest private club. Located at the top of the One City Center, the University Club features a spectacular view of the Tampa skyline.

All members, spouses, and guests are invited to attend the Arrivals Dinner, which will feature a steak and seafood menu.

On Friday spouses are invited to take a tour of the Salvador Dali Museum in St. Petersburg,

Florida. The museum is the home of the world's most comprehensive collection of Dali's works. Unrivaled in scope and complexity, the Museum's collection includes 94 original oils, over 100 watercolors and drawings, nearly 1,300 graphics, plus sculptures, objets d'art, photographs, documents, and an extensive archival library.

The vast collection was created by A. Reynolds and Eleanor R. Morse, Dali's friends and scholarly collectors since 1942. The Morse collection was originally displayed in a wing of their office building near Cleveland, Ohio. A nationwide search for a permanent home for the collection culminated in 1980 with the selection of St. Petersburg, Florida.

David W. Eggleston,
DDS

On December 4, 1992, the ADA Council on Dental Education will convene in Chicago to deliberate and vote on the College's petition to become the parent organization of the specialty of prosthodontics and sponsor the American Board of Prosthodontics.

It is anticipated that the FPO House of Delegates will vote in support of the College petition on September 19. The process was given a major boost with unanimous vote by the FPO Officers Committee on August 7.

This issue has challenged the diplomacy and the good will of prosthodontists as well as the structure of prosthodontic organizations.

Dozens of very distinguished individuals worked tirelessly to achieve a unifying proposal that has received overwhelming support. I hesitate to name people responsible for solving this issue for fear of leaving someone out. However, I must report that Frank Panno is at the top of the list. His concept of additional College Directors as liaisons to the FPO was the breakthrough so desperately needed to gain a consensus.

The College Board of Directors will have three additional voting members to be selected by the FPO and to act as liaisons between the ACP Board of Directors and the FPO member organizations.

This change is a paradigm shift in the history of the College. Many of the College goals and objectives are dependent upon becoming the parent organization of prosthodontics. Our ability to interrelate with the ADA, state dental boards, state and federal legislatures, and other specialties; raise corporate sponsorships; elevate the esteem of the specialty; launch a journal; provide regional and mid-year scientific sessions; enhance the graduate curriculum; provide input to the accreditation process, etc., etc.—all these goals and more are potentiated by becoming the parent organization of the specialty.

The growth of the College cannot occur without the guidance and expertise of our staff. The College is truly blessed to have Dr. David Schwab as Executive Director and Linda Wallenborn as Central Office Director. I wish to state my affection and admiration for both of them and thank them for the incredible work and loyalty they provide the College.

Enthusiastically looking forward to Tampa. ♦

Taste of Tampa

Continued from page 1

The Salvador Dali Museum opened on March 7, 1982.

On Friday afternoon, transportation will be provided to attendees registered for the Busch Gardens excursion. Attendees will enjoy the beauty and excitement of turn of the century Africa where Victorian charm mingles with panoramic views of big game animals roaming the Serengeti Plain. There will be time for attendees to sample the rides, shows, and attractions, followed by a cocktail party and a buffet dinner.

RETURN TRANSPORTATION TO THE HYATT WILL BE PROVIDED.

The meeting will end on an elegantly festive note with the President's Dinner Dance. The Hyatt hotel will be the site for this program finale, featuring the music of "Jack Golly," a twelve piece band with two vocalists and four dancers. This group is a big hit in Florida, where they are known for all types of music—from the big band sound of the '30's to '90's rock and roll.

"The President's Dinner Dance promises to be a first-class evening," said annual session chair Dr. Ned B. Van Roekel. "I want to emphasize that all members and their spouses are cordially invited to sign up."

Dress for the President's Dinner Dance is black tie optional.

See the enclosed Activities Registration form for details on all the social activities. ♦

New Board Format a Positive Surprise

"Very successful, we were pleased with the entire process," is the way Dr. Robert M. Morrow, President of the American Board of Prosthodontics, summed up the first experience of the revised format for the Phase II examination. One Desert Storm candidate participated in a clinical examination and 19 faced the new format.

The small number of candidates for this first examination permitted all except the clinical candidate to leave on Wednesday.

"Difficult yet fair, challenging but worth taking," was how new diplomate Dr. Albert Intonti of Lynn, MA described the three parts of the revised format.

Other comments from candidates included: "very difficult but fair; "comprehensive"; and "not as bad as I had anticipated."

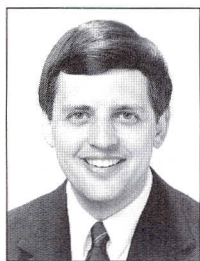

The Board was not dismayed by the rather small number of candidates taking the second phase. Rather, they were very enthusiastic about the way the examination unfolded with minimal concerns and very favorable responses from the candidates. The small number was anticipated with the first attempt at the new format. A much greater turn out is expected at Buffalo in 1993 and at LSU in 1994.

The revised format offers a more streamlined approach to the examination and is geared toward evaluating those areas of prosthodontics which are more clinically relevant and important. This was readily apparent to new diplomate Dr. Graziano Giglio of New York. "There were a lot of questions from the literature during Part I and the examiners kept their questions well confined to the patient presentations in Part 2. It was very much as I expected."

Perhaps the part of the examination responsible for the most anxiety was Part 3, the written portion. Here candidates were confronted with six 30 minute sections. Each section covered a different area in prosthodontics and was administered by a different examiner. The 15 questions were supported by whatever medium the examiner elected to use.

Dr. Morrow had a three-page patient history from which questions were asked relative to complete denture prosthodontics. Dr. Turner used projected slides and drawings to present his section on removable partial prosthodontics. The examiners will prepare a different section for each year and vary the presentation format. This should ensure that the format will remain dynamic and relevant.

Dale L. Cipra, DDS
Associate Editor

David Schwab, Ph.D.

The theme of this year's meeting is "Discovering the New World of Prosthodontics." The scientific program is designed to provide members with the latest clinical information backed by solid scientific research.

While the great majority of attendees will be prosthodontists, the College is hoping that many general dentists will pick up on our theme and discover the American College of Prosthodontists and its fine meeting.

Other specialty organizations—notably the American Academy of Periodontology—have been very successful in attracting general dentists as paid attendees to their meeting.

The benefits of guest attendance are numerous: more revenue, increased visibility for the College, and a greater appreciation on the part of the profession as a whole for the significant contributions that prosthodontists make to education, research, and patient care.

Due to first-ever efforts to market the meeting in 1991, a total of 42 guests attended last year's meeting, up from 7 in 1990. This year a special brochure is being sent to all dentists in Florida to publicize the meeting. In addition, news releases have been prepared for all dental editors in the United States.

To add a personal touch, a letter from local arrangements chair Dr. Joe Martineau will be sent to key dentists in Florida.

As you are aware, registration for the meeting is free for ACP members. The College provides a discount to all other individuals registering before October 28; non-member dentists pay only \$350 and individual members of FPO member organizations and the Florida Dental Association pay only \$295. After October 28, non-member dentists pay \$400 while individual members of FPO member organizations and the Florida Dental Association pay \$350.

One day registration passes are also available at \$150 for non-member dentists prior to October 28, and \$175 after October 28. Dental assistants, hygienists and technicians can attend the entire conference for a \$75 fee prior to October 28 and a \$95 fee after October 28. Single day rates for dental assistant, hygienists and technicians are \$35 prior to October 28 and \$45 after that date.

Individuals planning to attend the meeting are encouraged to register early and postdate their check to October 28.

Please spread the word to your general dentist colleagues that the College has an excellent meeting and that all dentists are encouraged to attend.

It's about time the rest of the dental profession discovered one of the best national dental meetings—the ACP annual session. ♦

John J. Sharry Prosthodontic Research Competition Finalists Named

The research committee has concluded its evaluation of candidates entered in the 1992 John J. Sharry Prosthodontic Research Competition to be held at the annual session in Tampa on Friday November 6th. Twenty-three abstracts were received from sixteen prosthodontic programs across the country. The following six semifinalists were asked to submit manuscripts:

***Dr. Craig M. Misch,**
University of Pittsburgh,
School of Dental Medicine

"Finite Element Stress Analysis of Tooth to Implant Fixed Partial Denture Design"
Sponsor: Dr. Y.H. Ismail

***Dr. Terry Orr,**
University of Minnesota,
School of Dentistry

"Galvanic Corrosion of Non Precious Alloy Casting Collars Coupled to Titanium Implants"
Sponsor: Dr. Richard J. Goodkind

***Dr. Arthur M. Rodriguez,**
University of Iowa,
College of Dentistry

"Evaluation of Strain at the Terminal Abutment Site of a Fixed Mandibular Implant Prosthesis during Cantilever Loading"
Sponsor: Dr. Steven A. Aquilino

Dr. Thomas R. Schneid,
Wilford Hall, United States Air Force Medical Center and University of Texas, Health Science Center at San Antonio

"An In Vitro Analysis of the Sustained Release System for the Treatment of Denture Stomatitis"
Sponsor: Dr. Robert J. Cronin

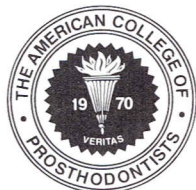

Dr. Thomas B. Smith,
Naval Dental School,
National Naval Dental Center

"Fracture Behavior of In-Ceram and Metal Ceramic Restorations"
Sponsor: Dr. Mark W. Richards

John J. Sharry Prosthodontic Finalists Named Research Competition

Continued from page 3

Dr. William E. Wood,
University of
Oklahoma, College of Dentistry

"Variables Affecting Silicione - Polymethyl Methacrylate Interfacial Bond Strengths"

Sponsor: Dr. Dean L. Johnson

Investigators with an asterisk will present their research paper at the annual session. College members will have an opportunity to evaluate the three finalists and participate in choosing the winner. The first place award is \$1000, second place is \$500, and third place is \$250. All three finalists receive an ACP award plaque and Study Guide for certification by the American Board of Prosthodontics. A contribution equal to the monetary awards will be sent to the finalists' institutions for use by prosthodontic program directors in advancing prosthodontic research. ♦

Exhibitors Aplenty for Annual Session

On display at the annual session will be the newest of dental technologies and materials. Over 30 commercial exhibitors will be at the meeting in Tampa.

Advanced Dental Concepts, Inc. ♦ Aseptico ♦ Basseler USA ♦ Calcitek, Inc. ♦ Columbia Scientific, Inc. ♦ Denar Corporation ♦ Dental Arts Laboratory, Inc. ♦ Dentsply Implant Division ♦ Dentsply International ♦ Designs for Vision, Inc. ♦ Equi-Dent Laboratory, Inc. ♦ Healthco International ♦ Hermanson Dental Services, Inc. ♦ Impla-Med Corporation ♦ Implant Innovations ♦ Interpore International ♦ Ivoclar USA ♦ Lifecore Biomedical ♦ Nobelpharma USA, Inc. ♦ Preat Corporation ♦ Proctor and Gamble Company ♦ Quintessence Publishing Co. ♦ Stryker Dental Implants ♦ Tel-A-Patient ♦ Teledyne Hanau ♦ Trident Dental, Inc. ♦ Valley Dental Arts, Inc. ♦ Vident Corporation ♦ W.B. Saunders Co. ♦ W.L. Gore and Associates, Inc. ♦ Warner Lambert Co. ♦ Whip-Mix Corporation

This year's annual session will be held at the downtown Hyatt Regency Hotel in Tampa, Florida, November 5-8.

A complete listing of courses and social activities appears below.

Everything you need to register for the meeting has been provided with this issue of the Messenger. Note especially the "Activities Registration Form" and the "Hotel Registration Card" included with this issue of the Messenger.

Last year's meeting set a record for attendance, so now is the time to start planning your trip to Tampa.

The College has secured discount air fares and car rentals rates for members attending the annual session. Members are advised to call the College's official travel agent, Sue Turner, for all their annual session travel needs:

Sue Turner

Thursday, November 5, 1992

The Annual Sessions Committee has organized an excellent education program for the 23rd Annual Session.

Private Practice Seminar

8:00 a.m. - 5:00 p.m.

Jennifer M. de St. Georges.
Educated Referrals are the Key to a Successful Prosthodontic Practice

Surveys show the majority of prosthodontists feel they would greatly benefit by the public, patients and referring practices being educated as to the benefits of the prosthodontist's special services and accompanying fees. This seminar will cover, in great detail and depth, the necessary verbal skills and education process needed to achieve this goal. Special emphasis will be given to developing a marketing strategy including how to develop a positive, productive relationship with the referral practice. Key practice management concerns including scheduling, financial arrangements and the hygiene program will also be fully explored.

Jennifer M. de St. Georges is an internationally renowned dental practice management speaker. She has spoken at every leading dental meeting in the United States, Canada and the U. K. Jennifer has built a solid reputation for providing the "nuts and bolts" of management in a highly motivating, practical and entertaining manner. She is on the editorial board for Dental Teamwork, the ADA journal for dental personnel.

Annual Scientific Session

8:00 a.m. - 12:00 p.m.

James B. Jackson, DDS
Winning Financial Strategies for Prosthodontists

Knowing what investments will make the 90's the most profitable will be important if you plan to maintain the momentum of the 80's. What's hot and what's not in stocks, bonds, and mutual funds will be discussed as well as some valuable tools that can make reaching your financial goals easier. Capital accumulation analysis and asset allocation for optimum results will be explained as well as answers to questions such as, "How much is enough?" Choosing between yourself, mutual funds or an investment advisor will be explored in order for you to determine which is best for you and your future.

1:15 p.m. - 5:00 p.m.

Charles S. Greene, DDS
Harold T. Perry, DDS
What Prosthodontists Need to Know about TM Disorders - 1992

Previous concepts about TM disorders have emphasized structural and mechanical dental factors. As a result, these were the main factors that were analyzed in diagnosis and applied in treatment. However, research over the past twenty years indicates that this may not be the appropriate perspective for all TM problems; instead, a broader view of orthopedic, physiologic and psychosocial principles should be incorporated in the diagnosis of the various problems to provide a more relevant current therapy. Doctors Greene and Perry will present their concepts in the diagnosis and treatment of craniomandibular dysfunction patients. The possible application of stabilization procedures utilizing orthodontics, orthognathics, and restorative dentistry will be presented.

Spouses are invited to attend Dr. James B. Jackson's lecture on Thursday, November 5 from 8:00 a.m. to 12:00 p.m.

Dr. Jackson's lecture is entitled "Winning Financial Management Strategies for Prosthodontists." Typically attracting both dentists and spouses, Dr. Jackson's programs are a family affair.

Dr. Jackson is an internationally known investment expert who just happens to be a dentist. He has presented popular, no nonsense financial programs to dentists and spouses for many years.

ACP Executive Director Dr. David Schwab gives Dr. Jackson a personal endorsement. "I first met Jim Jackson when I was in charge of practice management seminars for the ADA," Schwab said. "Jim has an amazing ability to hold an audience's attention and explain complex topics in understandable terms. He is a top-notch speaker who provides more useful content in his presentations than many other speakers I have heard."

Schwab also commented on the role of spouses at Dr. Jackson's seminars. "Most dentists bring their spouses to Jim's presentations," Schwab said. "The spouses get as much out of the programs as the dentists. I can also tell you that dentists who attend without their spouses always regret that their better half missed the lecture."

According to annual session chair Dr. Ned B. Van Roekel, the annual session committee hopes that spouses will attend Dr. Jackson's lecture and that a precedent will be set to gear at least one lecture at the annual session in future years to both members and spouses. ♦

Friday, November 6, 1992

8:00 a.m. - 9:00 a.m.

Daniel A. Buser, DDS
Current Status in Implant Dentistry - Biological and Surgical Aspects

In the first section of the presentation, the current knowledge about the tissue integration of dental implants, including aspects of bone and soft tissue reactions around root form titanium implants, will be presented. The surgical procedures necessary to achieve successful tissue integration will be discussed. Furthermore, appropriate surgical techniques including the membrane technique will be addressed to satisfy the demands of the prosthodontist concerning implant positioning and esthetics.

9:00 a.m. - 10:05 a.m.

John J. Sharry Research Competition

10:05 a.m.-10:30 a.m.

Break

10:30 a.m. - 10:35 a.m.

Palm Springs Preview: The 1993 Annual Session

10:35 a.m. - 11:35 a.m.

Robert E. Marx, DDS
The New Face in Oral Cancer Management

Modifications into precision cancer surgery preserving vital tissues such as the condyle, the maxillary tuberosity, facial nerve branches, and the spinal accessory nerve are now possible. Predictable soft tissue and bony reconstructive techniques are capable of consistently providing continuity, osseous bulk, and alveolar bone height to the jaws to facilitate prosthetic rehabilitation for these patients.

11:35 a.m. - 12:05 p.m.

Peter F. Johnson, DMD
Racial Variation: Esthetic and Prosthetic Significance

A review of the orthodontic literature reveals that different races demonstrate a wide variety of cephalometric norms. Prosthodontists need to be knowledgeable of the unique phylogenetic characteristics of their patients to properly evaluate the esthetics of people from dissimilar ethnic origins. The resultant esthetic differences can have significance in the function and design of prostheses.

Scientific and Professional Programs

Saturday, November 7, 1992

8:00 a.m. - 9:00 a.m.

Randall K. Berning, J.D.
What Every Prosthodontist Should Know About Informed Consent

This presentation will provide prosthodontists with a fundamental understanding of informed consent doctrine development. Mr. Berning will distinguish informed consent claims based on traditional assault and battery from modern negligence theory — and explain why the difference is significant. The presentation will address why there is a duty on the part of the prosthodontist to disclose certain information to a patient and what that duty entails.

9:00 a.m. - 10:00 a.m.

Franklin S. Weine, DDS, MS
Update on New Endodontic Filling Techniques

Recently, several new endodontic filling techniques have been introduced promising a number of unusual and desirable properties. But, do they deliver? And how do they compare with the old reliable — laterally condensed gutta-percha? This presentation will describe the uses of Ultrafil, Theramil, Obtura, and Endotec.

10:00-10:30 a.m.

Break

10:30 a.m. - 11:30 a.m.

Maxwell H. Anderson, DDS, M.Ed.
Treating Dental Caries: The Cutting Edge is not a Dental Bur

Dental caries has been shown to be a bacterial infection transmitted primarily within the family unit. This presentation will focus on the nature of the infection and the ways in which the practitioner can diagnose and treat the infection. The presentation will focus on strategies which can be used in the office of the dental practitioner. The presentation will include product recommendations and specific protocols for successful treatment of the infection.

10:30 a.m. - 12:00 p.m.

David Schwab, PhD
Communicating Value for the Dollar to Patients in a Prosthodontic Practice

Prosthodontists perform some of the most exacting procedures in dentistry, yet patients often fail to appreciate the value of prosthodontics. Attendees will

learn how to increase case acceptance and collections, communicate the value of advanced prosthodontic procedures to patients, distinguish the prosthodontic practice from a general dental practice, and increase referrals from patients and professionals.

11:30 a.m. - 12:00 p.m.

Wayne V. Campagni, DMD
An Accelerated Technique for Casting Post and Core Restorations is Compared to Four Conventional Techniques

A technique for an accelerated method for making post and cores is presented. Data will be shown comparing this technique to four traditional methods. The parameters are fidelity of seating, surface roughness, and porosity.

1:30 p.m. - 4:00 p.m.

Table Clinics

1:30 p.m. - 5:00 p.m.

Chair - Carl W. Schuller, DDS
Sections Meeting:
Preparation for House of Delegates Meeting

1:30 p.m. - 5:00 p.m.

Moderator:
Ronald P. Desjardins, DMD, MSD
Educators/Mentors Seminar:
Revising the Standards for Advanced Specialty Education in Prosthodontics

The American College of Prosthodontists has taken the lead in addressing Prosthodontics 21 objectives suggesting an extensive review of the Standards for Advanced Specialty Education in Prosthodontics. All program directors have been asked to provide input to a group of consultants who developed a prototype document which was again reviewed by program directors. At this conference, it is anticipated that consensus will be reached on Standards revision which can be forwarded to the Commission on Dental Accreditation for action. Consultants for the project are Drs. J.R. Agar, C.J. Andres, S.A. Aquilino, D.L. Cipra, H. Litvak, and P.M. Lloyd. Facilitator: D. Schwab.

The American College of Prosthodontists acknowledges a grant from the Education and Research Foundation of Prosthodontics to partially fund the expenses of program directors who attend the meeting.

Sunday, November 8, 1992

8:00 a.m. - 9:00 a.m.

Gordon J. Christensen, DDS, MSD, PhD
New Materials and Techniques for Better Fixed, Removable, and Implant Prosthodontics - 1992

This overview of the three major prosthodontic areas will be a pragmatic update on cutting instruments; tissue management; custom trays; impression materials; interocclusal records; types of teeth; ceramic crowns; and implant heads, including many new products evaluated recently by Clinical Research Associates.

9:00 a.m. - 9:30 a.m.

John S. Sottosanti, DDS
Preprosthetic Bone Regeneration with a Calcium Sulfate Resorbable Barrier

The prosthodontist's results can be directly or indirectly influenced by the height, width, and density of the alveolar bone. Calcium sulfate is a safe, efficient, and effective resorbable barrier to aid in guided bone regeneration. This procedure improves upon other guided tissue regenerative modalities because of its ease of use and lack of postoperative complications.

9:30 a.m. - 10:00 a.m.

Ward Smalley, DDS
Osseointegrated Implants in Orthodontics - Prosthodontic Implications

Osseointegrated implants have great potential in orthodontics and dentofacial orthopedics. They have the ability to provide skeletal anchorage to facilitate the movement of teeth and facial bones. They also have the ability to provide support for the prosthetic replacement of missing teeth following orthodontic care. The results of recent research will demonstrate the capability of implants as anchorage units.

10:00 a.m. - 10:30 a.m.

**Noel D. Wilkie, DDS
A New Computer Program to
Select Artificial Teeth**

A new application of computers which is useful in the office, the commercial laboratory, and the dental school is now available. The use of the computer in the selection of artificial teeth brings this step in prosthesis construction into contemporary times. The history of tooth selection systems and the parameters of the selection process will be discussed.

10:30 a.m. - 11:00 a.m.

**Robert R. Winter, DDS
Does the Science Behind the
Ceramic Material Help the
Artistic Component?**

At a time when the patients' cry for greater esthetics grows even louder, it is easy to forget the solid fundamentals that brought us to this point. Natural esthetics is the result of basic principles performed well. It is also enhanced by the science behind the manufacturing of the ceramic materials. Current concepts and techniques will be reviewed showing their clinical implications.

The glittering Tampa skyline.

Tampa features natural beauty, warm weather, great food, and lots of fun. All of these will be in plentiful supply at this year's annual session. A list of social activities that will take place outside the hotel appears below. A complete list of all social activities, including luncheons, can be found on the enclosed Activities Registration Form.

with many antique shops. Lunch at the famous Columbia restaurant, a real Spanish gem. Visit the picturesque University of Tampa and its historic museum. Then a drive along Bayshore Blvd.

Friday, Nov. 6, 1992

**9:00 a.m. - 2:00 p.m.
St. Petersburg and Dali Museum**

Discover the world of Salvador Dali in the St. Petersburg's famous museum that houses the world's largest collection of Dali's works. This vast collection of oil paintings, watercolors, graphics and sculptures spans more than 60 years of Dali's genius. Lunch will be at one of St. Petersburg's better restaurants.

3:00 p.m. Busch Gardens and Dinner

Arrive at Busch Gardens at approximately 3:30 p.m. Enjoy the rides, shows and attractions until 6:00 p.m. Then proceed to the Crown Colony Hospitality level for cocktails and hors d'oeuvres. The patio overlooks the Serengeti plains. See the new gorilla compound. At 7:00 p.m., enjoy a sumptuous Busch Gardens buffet with entertainment. At 9:00 p.m., return to your motorcoach for departure.

Saturday, November 7, 1992

6:30 a.m. Steve Gordon Memorial 5K Run
Scenic Bayshore Blvd.

7:30 p.m. President's Dinner Dance.
Elegant dinner. Music by "Jack Golly" 12-piece band.

Wednesday, Nov. 4, 1992

11:30 a.m. Golf Tournament

The tournament will be played at River Hills Golf and Country Club. The course opened in 1989 and was designed by Joe Lee. PGA pro is Jack Sauers and LPGA pro is Joanne Washam.

Deli buffet prior to 1:30 tee time.

7:00 p.m. - 9:00 p.m. Arrivals Dinner

University Club - The University Club is Tampa's oldest private club. It's located at the top of One City Center adjacent to the hotel. It has a panoramic view of the entire city.

Thursday, Nov. 5, 1992

8:30 a.m. - 4:30 p.m. Ringling Museum

See the beautiful estate of John and Mable Ringling which resembles a Venetian palace. Visit the circus museum and see the authentic parade wagons and costumes of circus history. See the world famous Ruben collection and art collection. Lunch included - your choice at one of four great restaurants on St. Armands Key.

9:00 a.m. - 2:00 p.m. Historic Tampa

Visit Tampa's colorful Latin quarters. See Ybor Square, a converted cigar factory

Crown Colony House, Busch Gardens

College Takes Position on Shade Verification by Technicians

A position statement prepared by the ACP Dental Laboratory Services Committee on the use of dental laboratory technicians to verify shade selection was approved by the Board of Directors. "The College's strong stand on this issue should go far to enhance relationships with our colleagues in the dental laboratory field," said Dr. Terry L. Eggleston, chair of the committee.

This position statement will be forwarded to several organizations, including the American Dental Association. Published in the ACP Membership Roster. The statement reads as follows:

POSITION STATEMENT ON SHADE VERIFICATION

The process of fabricating fixed and removable dental prostheses often requires the selection of a tooth shade, or color that matches the natural dentition or existing restoration. It is often common practice to recruit the services of dental laboratory technicians who can verify the shade already taken by the dentist. This is an artistic, not a therapeutic procedure, and it is often best performed by the individual who will be actually fabricating the prosthesis, inasmuch as color may be difficult to communicate precisely between the dentist and the laboratory technician. For reasons of quality control and convenience, many dentists send the patient to the laboratory for this procedure.

This practice, illegal in most states, places the dental technician in a dilemma. Concerns relative to insurance matters, legal parameters, and possible transmission of disease are considerations the laboratory must address. To refuse to perform this procedure would jeopardize the laboratory technician's position with the practitioner, while complying clearly

places him or her in a compromising position. It is apparent that this situation must be rectified, perhaps by legalizing, under strict guidelines, what is already a common practice. Proponents of laws allowing dental technicians to become involved in this process contend that the verification of tooth shades does not constitute the practice of dentistry.

The American College of Prosthodontists supports the legalization of a dental laboratory assisting in the shade verification process, either in the dental office or in the laboratory which may not be part of the same facility, providing the following parameters are strictly met:

1. That the procedure and referral be performed under the direction of a work authorization by a licensed dentist.
2. That the dental laboratory is verifying or confirming the shade as previously determined by the dentist. Changes from the shade prescribed by the dentist will be made only after further consultation and agreement with the prescribing dentist.
3. If there is substantive disagreement with the shade recorded by the dentist, the patient is referred back to the dentist for confirmation by the dentist.
4. That the process involve only this verification and exclude other actions such as removing and recementing provisional restorations, or provisionally cementing permanent restorations.
5. That the laboratory maintain strict aseptic barrier techniques as determined by ADA, OSHA, and CDC guidelines, which would prevent the transmission of organisms via shade tabs, hands, etc., and that these aseptic techniques be subject to routine inspection and upgrading if necessary. ♦

President Eggleston to Join ADA Council

Dr. David Eggleston reviews OSHA regulations with staff member Ms. Cheri Rudolph.

ACP President Dr. David Eggleston has been nominated to the ADA Council on Dental Research by Thirteenth District Trustee and past California Dental Association President Dr. George Paine.

Dr. Eggleston has just completed six years on the same CDA Council, the last three of which he served as chair. During his tenure he was widely recognized for his experience with OSHA related matters.

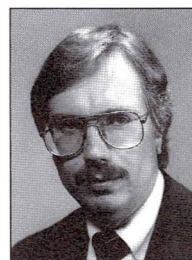

He is looking forward to working with the ADA when his position becomes official at the November, 1992 House of Delegates meeting.

R. Bruce Coye, DDS
Associate Editor

Revised Study Guide Available

The Education and Advancement Committee has completed their revision of the ACP Study Guide for Board Certification. It will be available through the ACP Central Office in November. Those attending the Board Preparation Course at the Annual Session in Tampa on Wednesday, November 4 will be issued a copy. The revised study guide features expanded organized fact sheets which are based on previous exam questions and a section with the most current information on the new examination format. ♦

Newsletter Editor Joins Faculty at Marquette University

Patrick M. Lloyd, DDS, MS
Editor-in-chief,
The ACP Messenger

Dr. Patrick M. Lloyd, Editor-in-Chief of the ACP Messenger, has accepted a full-time associate professorship at Marquette University School of Dentistry. Since 1978 he has been active as an adjunct faculty, supervising in the clinic and lecturing on prosthodontics and geriatrics.

Within the Department of Restorative Sciences, Section of Prosthodontics, Dr. Lloyd will contribute to the undergraduate and graduate prosthodontics programs. This includes clinical instruction in the main clinic areas of the school as well as the Special Patient Clinic. This clinic provides care for the medically compromised, physically disabled, and cognitively impaired patients.

Dr. Lloyd is also responsible for the Geriatrics programming for the prosthodontic graduate students, dental students, and hygiene students. He is developing an integrated and interdisciplinary approach to geriatric dental education, one that encourages each discipline to offer its special expertise in managing the problems of older patients.

Dr. Lloyd is looking forward to this new challenge. "Marquette has just hired an experienced and dynamic dean from Dalhousie University, Dr. Kenneth Zakariasen, whose strength at promoting interdisciplinary research means many new opportunities for our staff and students," said Dr. Lloyd. "It's a perfect time to join the faculty of the dental school." ♦

Wisconsin Section to Give Table Clinic on Promoting Specialty

The Wisconsin Section of the ACP will present a table clinic at the Annual Session in Tampa on how it is promoting the specialty within the state. Audiovisuals used by members to lecture on prosthodontics and educational brochures will be the highlight of the clinic.

"Our promotional efforts are all educationally based," commented Dr. Charles Kass, President of the Wisconsin Section. "We have provided our members with materials that will make it easier for them to promote the services of prosthodontists and educate other health care professionals and the public."

The Wisconsin Section is working closely with the state dental association. A list of Wisconsin College members who are available to lecture on the care of older patients has been

distributed to WDA constituencies. And as a portion of the 1992 annual session, the Wisconsin Section is presenting a half-day symposium on issues in prosthodontics. This is planned to be an annual event, it examines new treatments provided by prosthodontists and covers a selection of basic prosthodontic procedures that general practitioners can use in their practices.

The table clinic will review the slide program prepared for section members that can be used for presentations to a wide variety of professional and lay audiences. Copies of the brochure that were sent to state dentists announcing the "Prosthodontic Symposium" scheduled at the Annual Session of the WDA will be distributed. ♦

Advancing the specialty through educational programming has been the theme of Dr. Charles A. Kass' tenure as President of the Wisconsin Section.

Board of Directors Endorses Matching Program for Graduate Admissions

At the June meeting of the Board of Directors of the ACP, members voted unanimously to endorse the use of the Matching Program for specialty training programs in prosthodontics starting in 1993 for residents/graduates beginning training in 1994. Participation is voluntary and will not include one-year maxillofacial training programs or prosthodontic residencies sponsored by the military.

Support for the Board's endorsement came from a survey recently completed by the Education and Advancement Committee which examined program directors' interest in participating in the Match. The majority of graduate program directors indicated that they would use the Matching Program. It is noteworthy that those who were opposed to using the Match would be willing to reconsider their decision in the future. Only four directors reported that they would not participate even if the majority of programs participated. Their objections were related to cost or that their program was in some way "different from the others."

The Matching Program has been used for admissions to postdoctoral dental positions since 1985. The program is used by general practice residencies, advanced education in general dentistry programs, and advanced specialty education programs in oral and maxillofacial surgery, pediatric dentistry, and periodontics.

The Matching Program provides an orderly process to assist applicants in obtaining positions in programs of their choice and to help programs obtain applicants of their choice. The Match also establishes uniform deadlines for applications, interviews, and notification of selection.

A representative of the Matching Program will make a brief presentation at the Educator/Mentors Seminar in Tampa on Saturday November 7th. Additional information can be obtained from Mr. Elliot Peranson, National Matching Services, P.O. Box 1208, Lewiston, NY 14092, (716) 282-4013.

Chairman, Education and
Advancement Committee*

Alabama Becomes 34th ACP Section

July 1992 marked the official charter of the Alabama Section of the American College of Prosthodontists, making it the 34th ACP section. Twenty members were listed as charter members.

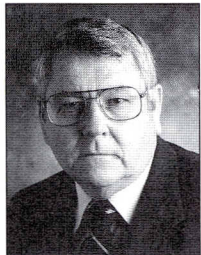

Dr. Dean L. Ramus was elected as President, Dr. Dwight L. Castleberry as Vice President, and Dr. John B. Farmer as Secretary/Treasurer. They will hold their inaugural meeting this fall in Birmingham.

Europeans Launch New Prosthodontics and Restorative Dentistry Journal

Beginning in September 1992, Mosby-Year Book European will publish **The European Journal of Prosthodontics and Restorative Dentistry**. According to pre-publication information, this new journal provides a wide scope of information on prosthodontics, operative dentistry, implantology, endodontics, periodontics, dental materials, and technology. Articles include research reports, literature reviews, clinical reports, and case studies. It has an editorial advisory board composed of representatives throughout Europe. A peer-reviewed journal, it is published quarterly.

For information please contact: Paul S. Wright, Editor, **The European Journal of Prosthodontics and Restorative Dentistry**, Department of Prosthetic Dentistry, The London Hospital Medical College Dental School, Turner Street, London, E1 2AD, United Kingdom. ♦

American Board of Prosthodontics

Atlanta, GA 30306
404-876-2625 FAX 404-876-2625

Elections of Board Officers

New officers of the Board were elected during the June meeting. These included: Dr. Robert M. Morrow, President, Dr. James W. Schweiger, Vice President, Dr. Robert S. Staffanou, Secretary-Treasurer. Dr. Charles J. Goodacre had been previously elected by the active Diplomates to serve on the Board. He replaces Dr. Kenneth A. Turner whose term of office expired on August 31, 1992. Dr. Goodacre participated as an observer in the recent Phase II examination. ♦

New Diplomates

The following candidates were successful in completing the Phase II examination and were certified on June 24, 1992.

Dr. Michael R. Arcuri, Iowa City, IA
Dr. Martin F. Artola, Los Mochis, Mexico
Dr. Antolino Colon-Camacho,
Rio Piedras, PR
Dr. Graziano D. Giglio, New York, NY
Dr. Guillermo E. Guillen, Plano, TX
Dr. William R. Hogans, Ft. Stewart, GA
Dr. Albert John Intonti, Peabody, MA
Dr. Eric Milton Langenwalter, E. Alton, IL
Dr. John H. Pitchford, Sierra Vista, AZ
Dr. Warren C. Rivera-Morales, Augusta, GA
Dr. Henry C. Seymour, Ft. Campbell, KY
Dr. Scott Arthur Synnott, San Diego, CA
Dr. Miles J. Yacker, Lawrence, NY

The members of the Board wish to extend their congratulations to these new Diplomates and hope that others will do the same when they have the first opportunity. ♦

Requests From the Executive Director of the Board

In order to assure that the records of the Board are up-to-date, please furnish Dr. Culpepper with any change of address. This office has been unable to locate the following individuals: Drs. Jerry C. Campbell, Martin E. Comella, Gerald M. Galvin, Alvin H. Hinger, John E. Holt, Dean A. Hudson, John N. Rogerson, Keith S. Smith. If you have any information as to their location, please inform Dr. Culpepper. Information relative to the status of individuals in the military service is also requested. If you are no longer on active duty, please contact the office of the Executive Director of the Board. ♦

Recertification

All prosthodontists have recently received a document outlining a proposed format for recertification. The Board encourages each of you to find time to complete the short questionnaire and return it to Dr. Culpepper. Your input is important to the Board in finalizing the document. ♦

Sections to Assume Broader Role

Sweeping new Bylaws changes and the implementation of the reorganization plan will lead to a much broader role for the Sections starting next year.

The increased emphasis on the Sections has not surprisingly generated much work for the Sections Committee, according to Dr. Carl W. Schuller, chair.

"The Sections Committee has been extremely active with the implementation of the new reorganization plan and the formation of the American College of Prosthodontists House of Delegates," Dr. Schuller said. "With the acceptance of the reorganization plan, the sections will assume a direct role in the governance of the College."

Each state that has at least three members will be requested to form a section. Each section will elect a delegate and an alternate delegate to represent the membership within the state. States that cannot form a section will elect an at-large delegate and an alternate delegate.

The committee has targeted all the states that can form a section. They have been contacted and many will form a section this year. This form of representation by a House of Delegates will replace the annual business meeting beginning in 1993.

In preparation for the House of Delegates, the committee is preparing a manual for the delegates to use. This manual will be discussed in detail at the 1992 Annual Session in Tampa during the Sections Meeting on Saturday, November 7 from 1:30 p.m. to 5:00 p.m.

A full agenda will enlighten all members to the accomplishments of the Sections and the College this past year. A luncheon will proceed this meeting. All interested members are invited to attend. ♦

Meetings and Conferences Calendar

- October 17-21, 1992** **Annual Session of the American Dental Association, Orlando, FL.**

ACADEMIC OPPORTUNITIES

Connecticut - Full-time, tenure track position of Director of Graduate Prosthodontics available in the Department of Prosthodontics. Starting date negotiable. The Department is responsible for undergraduate and graduate instruction in dental morphology, occlusion, dental materials, fixed prosthodontics, removable prosthodontics, implant prosthodontics and maxillofacial prosthetics. Position requires DDS/DMD degree and formal training in Prosthodontics from an ADA accredited program. Board certification is required. Ability/experience to teach all phases of clinical prosthodontics desired. Applicants with a strong interest in research are aggressively sought. Academic rank and salary commensurate with experience and credentials. Intramural practice opportunity available and encouraged. Reciprocal Connecticut dental licensure available. The University of Connecticut is an EEO/AA employer. Send curriculum vitae to Dr. Thomas D. Taylor, Head, Department of Prosthodontics, UCONN School of Dental Medicine, Farmington, CT 06030.

PRACTICE OPPORTUNITIES AVAILABLE

Minnesota - Well established and growing prosthodontic practice for immediate sale due

to death of Dr. Robert C. Dahlberg. Large geographic referral area, excellent gross, very reasonable terms, excellent hunting, fishing, skiing, on the shore of Lake Superior. Call Pam Dahlberg, Office Manager (218) 722-1244 or home (218) 721-3756.

New England (Central)—High quality prosthetic practice seeks associate with buy-in potential. Must be experienced in both fixed and removable prosthodontics and formally trained. Send resume and goals to ACP, Dept. Z, 1777 N.E. Loop 410, Suite 904, San Antonio, TX 78217

Texas - Retiring in 1993. A beautiful office with a fully equipped laboratory. Trained staff (3). Practice is located in NW San Antonio at I-H and Loop 410. Specializing in fixed and removable prosthodontics with cosmetic and TMD interest. Terms negotiable. Contact Conrad E. McFee DDS, MSD, 3355 Cherry Ridge Dr., Suite 108, San Antonio, TX 78230, (512) 344-8583, evenings/weekends (512) 494-8308.

PRACTICE OPPORTUNITIES WANTED

Board eligible prosthodontist seeks an association leading to a partnership or ownership of a quality fixed, removable, implant and cosmetic prosthodontic practice. Clinical,

research, and design experience with multiple implant systems preferred. Please telephone (614) 365-2125 or write Prosthodontist, 2893 Neil Ave., Suite 402D, Columbus, OH 43202.

GRADUATE TRAINING OPPORTUNITIES AVAILABLE

Applications are requested for a combined fixed, removable, maxillofacial, and implant prosthodontic program. Applicants can apply for a two-year certificate program or a three-year Master of Science program. Residents accepted to this program will begin their training July 1, 1993. Annual stipend of \$4000 to \$5000 is offered. Candidates should have a General Practice Residency or private practice experience. The University of Texas Houston is committed to the policy that all persons shall have equal access to its programs, facilities, and employment without regard to race, religion, color, gender, national origin, disability, or veteran status. For information contact Dr. Thomas L. Hurst, Director of Graduate Prosthodontics, University of Texas, Health Science Center, Dental Branch, 6516 John Freeman Ave., Houston, TX 77225. ♦
